GREATER CINCINNATI WATER WORKS ANNOUNCES START OF CONSTRUCTION ON INSTALLATION OF NEW WATER MAIN ON RIDGE RD., FROM RIDGEWOOD AVE. TO RONALD REAGAN CROSS COUNTY HIGHWAY

To provide better service to our customers, Greater Cincinnati Water Works (GCWW) has contracted with Adleta Construction to install a new 12-inch water main on Ridge Road from Ridgewood Avenue to Ronald Reagan Cross County Highway.

Construction is tentatively scheduled to begin June 18, 2007, and is expected to take 180 days with differing traffic conditions.

To facilitate construction activities, the following traffic restrictions will be in place.

Traffic Restrictions:

- Any work occurring in or within 200 ft. of the signalized intersections of Ridge and Section and Ridge and Galbraith shall require the services of an Amberley Police Officer and cruiser to assist in the movement of traffic.
- No work shall occur between the hours of 7 am to 9 am and 11 pm to 7 am for the duration of the project.
- Additionally, no work within 200 ft. of signalized intersections will be permitted between the hours of 4 pm to 6 pm.
- During the construction of the north phase from Cross County to Galbraith Road, one lane of traffic will be maintained during working hours. During all working hours, flaggers shall be used to maintain a single lane of traffic.
- During the construction of the phase from Galbraith Road to Section Road, the road will be closed to through traffic. Detours will be posted for this phase of the project. Emergency access and local traffic will be maintained during this phase.
- During the construction of the south phase from Section Road to Ridgewood, one lane of traffic will be maintained during working hours. During all working hours, flaggers shall be used to maintain a single lane of traffic.
- During non-working hours, all lanes will be open and available for traffic.
- Emergency and local traffic will be maintained at all times.

At times, unforeseen situations, beyond the control of the Contractor or Greater Cincinnati Water Works, may cause delays in traffic movement.

We hope our customers will pardon any inconvenience that may result from this water main improvement. Disruption to present water service will be kept to an absolute minimum.

A Greater Cincinnati Water Works inspector will be present during construction operations. Please feel free to address any concerns regarding the construction operations with our representative. Andy Orth, Senior Engineer, at 513-591-5038, is also available to answer questions about this project.
